

Search locations & navigation on Google Maps

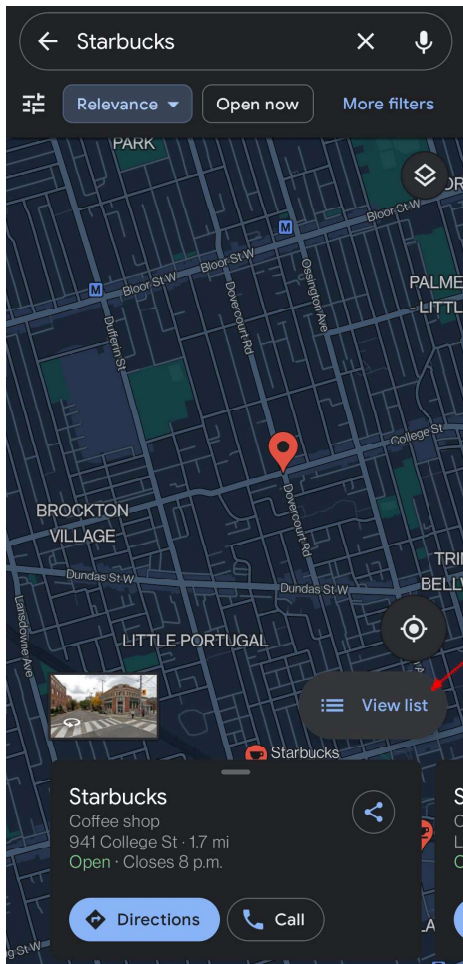

This is the home screen of Google Maps.

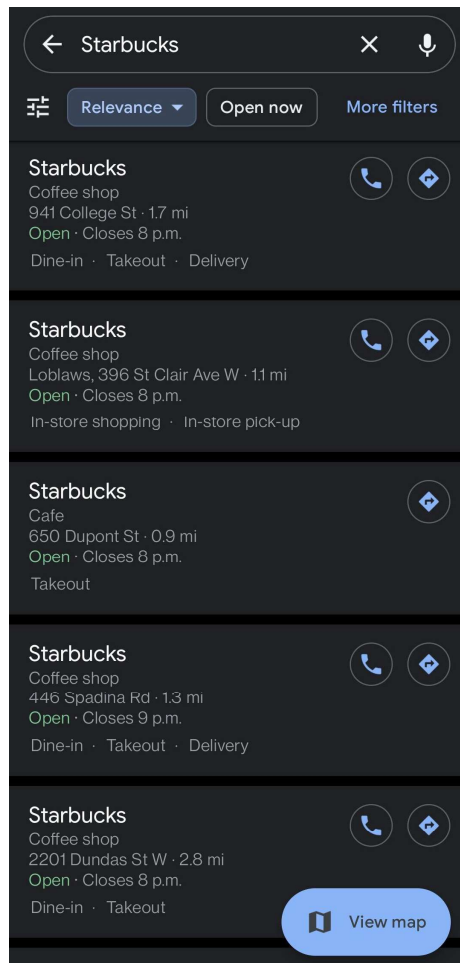

Tap here to begin your search.

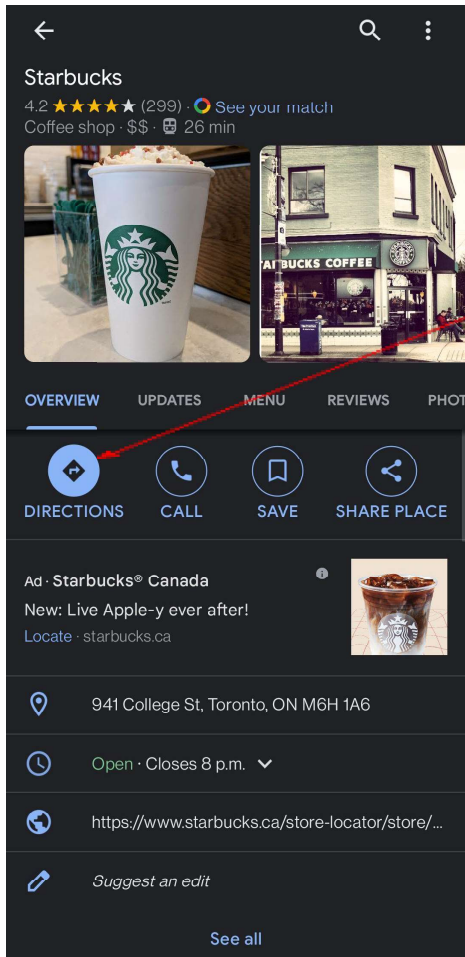

Next, type the name of the location.

Google Maps will find the closest establishment near your location. To find a list of all locations, tap “**View list.**”

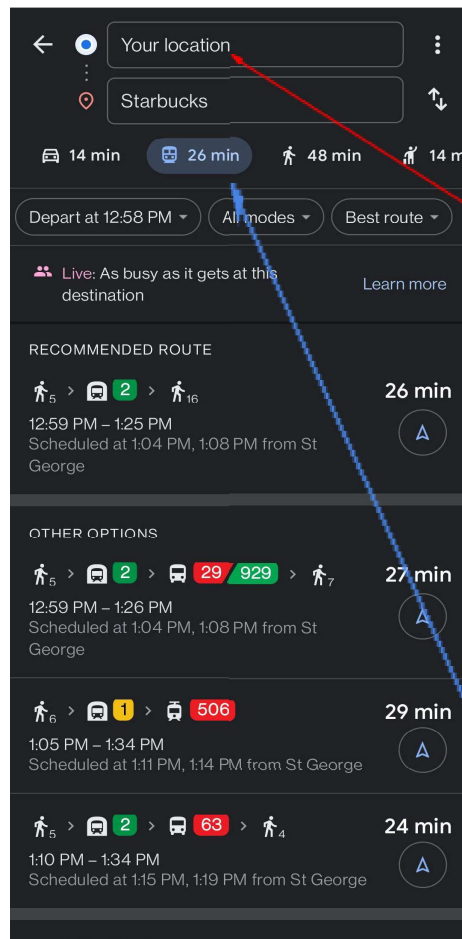

Tap the location you want to go.

This opens more details about the establishment.
Tap **"directions."**

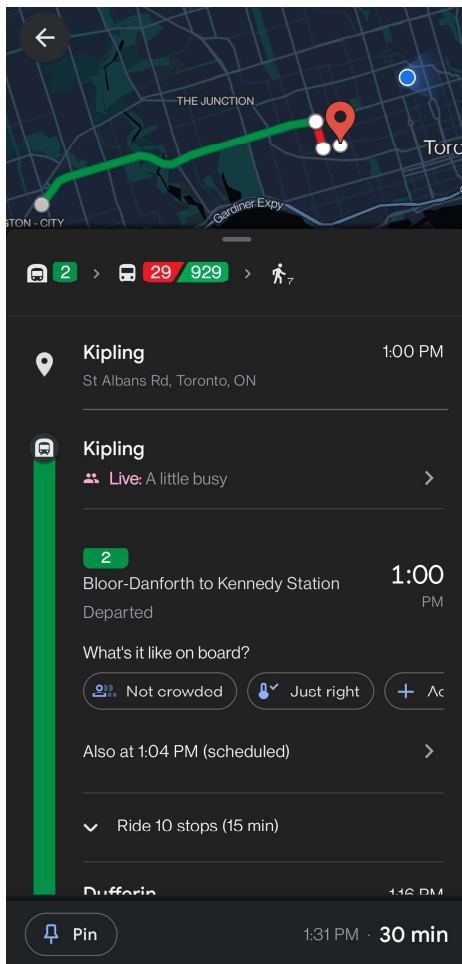

Here are various different routes Google Maps has created for you.

Tap here to type your starting location.
Google uses your phone's current location by default (indicated by the blue dot icon on the left).

Next, tap on the route you want to take.

Note: you may change the mode of transportation

Google Maps is now navigating you to your selected location. To view the full directions, scroll down on the directions.

Note: when you arrive at your location Google Maps will automatically stop navigating.
